

Navigator 17 released

mapFactor **NAVIGATOR 17**

Navigator 17, a new version of the offline GPS navigation software for Windows devices, has been recently released. It is based on the best rated free offline navigation app for Android devices – [MapFactor Navigator](#).

Navigator for Windows has been already **downloaded 5 million times**.

There are two versions. **PC Navigator 17** for computers and laptops running **Windows Vista/7/8/10** and **Pocket Navigator 17** for navigation devices running **Windows CE**. Pocket Navigator 17 is also used on [Actis GPS navigation devices](#) for cars and trucks.

Navigator 17 provides **maps and voice navigation** for Europe, USA, Canada or other countries.

Similarly to the Android version, Navigator 17 can be used with two types of maps. [Navigator Free](#), using maps from the OpenStreetMaps project, or [Navigator Standard/Truck](#) with more detailed, professional TomTom maps.

Navigator 17 Truck includes information about large vehicle restrictions, optimising a route based on height and weight to avoid low bridges, narrow lanes and more.

Short videopresentation on PC & Pocket Navigator is available [here](#).
