

MapFactor Releases Navigator 25 With Updated Offline Maps and Enhanced Integration Features

Prague, June 11, 2025

MapFactor has just launched Navigator 25, the latest version of its reliable offline navigation software for Windows and Windows CE devices. The new release includes updated offline maps for over 200 countries, enabling more accurate and dependable route planning — even without an internet connection.

Designed for PCs, laptops and in-vehicle systems, Navigator 25 supports both Standard maps (for cars and vans) and Truck maps tailored for larger commercial vehicles. With more than five million users worldwide, MapFactor Navigator remains a trusted solution for both individual drivers and system integrators.

Key features of Navigator 25 include:

- Turn-by-turn voice navigation
- Multiple vehicle profiles and route optimisation modes
- Speed limit and safety camera warnings
- Lane guidance and motorway signage
- Day/night display
- Support for [remote commands](#) (external control)
- [Import of custom POIs](#), lines and areas directly into the map
- [Integration into telematics systems](#)

Navigator 25 can be easily embedded into wider telematics or fleet management systems, making it a popular choice for developers and logistics operators.

Specialised version for trucks and large vehicles

Navigator 25 Truck, powered by TomTom Truck maps, offers advanced routing tailored to lorries, buses and other heavy-duty vehicles. Routes are calculated based on the vehicle's height, weight and other

parameters to avoid unsuitable roads – such as low bridges, narrow lanes or restricted zones – helping drivers stay safe and compliant.

Platform availability

- PC Navigator 25: for Windows Vista/7/8/10/11
- Pocket Navigator 25: for navigation devices running Windows CE (Pre-installed on Actis GPS devices for both cars and trucks)

MapFactor Navigator GPS navigation is also available for Android and iOS, offering a consistent navigation experience across multiple platforms.
